8th Cyber Security and Information Intelligence Research Workshop

January 8 – 10, 2013

Adobe Systems, Inc.

Marisa Cherry
7930 Jones Branch Drive
5th Floor
McLean, VA 22102
(571) 765-5400
mcherry@adobe.com

<http://www.adobe.com/government>

Adobe solutions for government help agencies improve constituent service by replacing frustrating, manual, paper-based processes with engaging, intelligent PDF forms and rich Internet applications. Powerful security capabilities strengthen information and process assurance to help protect personal, agency, and classified government information from unauthorized access or alteration, promoting trusted communications. And the ability to instantly create virtual meeting rooms allows personnel to quickly collaborate with, and provide training to, anyone inside or outside the agency, in real time, regardless of where participants are located. Flexible and cost-effective, Adobe solutions simplify the business of government-anytime, anywhere, through any medium.

Question: Are you tasked with planning a conference, security awareness day or vendor exposition for your agency and need help?

Then We're Your Answer!

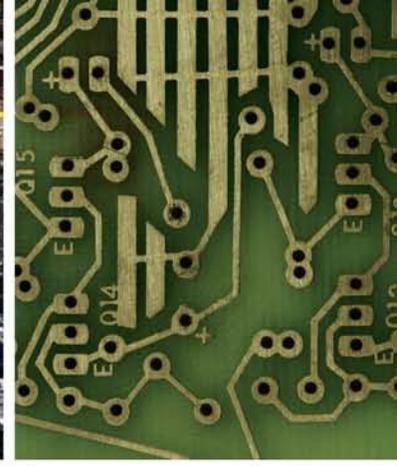

Relationships, Working Together

Federal Business Council, Inc.

Liz Hood (800)878-2940x227, liz@fbcinc.com
Bob Jeffers (800)878-2940x226, bj@fbcinc.com

TOMORROW starts here.

©2012 Cisco Systems, Inc. All Rights Reserved

Today, it's easy to marvel at how far we've come.

Our phones talk to our TVs to record our favorite shows. Doctors in Estonia diagnose patients in Denmark. Social networks help companies improve customer service.

And yet, up to now, more than 99% of our world is not connected to the Internet.

But we're working on it.

And tomorrow, we'll wake up pretty much everything else you can imagine.

Trees will talk to networks will talk to scientists about climate change.

Stoplights will talk to cars will talk to road sensors about increasing traffic efficiency.

Ambulances will talk to patient records will talk to doctors about saving lives.

It's a phenomenon we call the Internet of Everything—an unprecedented opportunity for today's businesses.

Tomorrow?

We're going to wake the world up. And watch, with eyes wide, as it gets to work.

#tomorrowstartshere
